

**PERFORMANCE EVALUATION OF HOMOGENOUS BOOSTING TECHNIQUE
FOR INTRUSION DETECTION IN ONLINE BANKING**

**JIBOKU, Folahan Joseph
LCU/PG/001817**

**Being a M.Sc. Thesis Submitted to the Department of Computer Science, Faculty
of Natural and Applied Sciences, Lead City University, Ibadan, Oyo State, Nigeria**

**In Partial Fulfillment of the Requirements for the Award of Master (M.Sc.) in
Information System**

2023

Certification

This is to certify that JIBOKU, Folahan Joseph with matriculation number LCU/PG/001817 carried out this research work titled “Performance Evaluation of Homogenous Boosting Technique for Intrusion Detection in Online Banking “in the Department of Computer Science, Faculty of Natural and Applied Sciences, Lead City University, Ibadan, Oyo state, for the award of Master of Science (M.Sc.) in Information System and that this has not been previously submitted in this institution or any other.

Dr Wumi Ajayi
(Supervisor)

Date

Dr Wilson Sakpere

Dedication

This research work is dedicated to Almighty God for his mercies and grace in abundance upon my life and to my family members.

Do Not Copy, Lead City University, Nigeria

Acknowledgements

I am delighted to express my heartfelt gratitude to Dr Wumi Ajayi my thesis supervisor for your immense support, guidance, and encouragement throughout the entire process of completing my thesis. Your unwavering commitment to my academic success has been invaluable, and I could not have completed this task without your invaluable contribution.

I appreciate the fact that you made yourself readily available to answer my questions and provide feedback, even when your schedule was tight. Your insightful comments and constructive criticism helped me refine my research methodology, sharpen my arguments, and present my findings more effectively.

Your unwavering support has been instrumental in my journey towards academic success, and I am forever indebted to you for your invaluable contribution. Your dedication to my academic growth has motivated me to strive for excellence, and I am confident that the knowledge and skills I have gained through this research will serve me well in my future endeavours.

I am also grateful to the staff of the computer science department, lead city university headed by Dr Wilson Sakpere for their support, also to my friend and Brother, Prince Emmanuel Adediran for his support.

I also extend my thanks to my family, Oladele, Olubisi, Timothy and Morolake for their unwavering support throughout my academic journey.

Once again, I express my deepest appreciation to you for your invaluable contribution to my academic growth.

Although, the above-mentioned institutions and persons have assisted in the process of this research work, I alone stand responsible for the errors, if any, found in the work.

Table of Contents

Certification	i
Dedication	ii
Acknowledgements	iii
Abstract	iv
Table of Contents	v
List of Tables	vi
List of Figures	vii
Chapter One: Introduction	
1.1 Background to the study	1
1.2 Problem Statement	4
1.3 Justification for the Study	6
1.4 Aim and Objectives	8
1.5 Significance of the study	9
1.6 Scope of the study	11
1.7 Limitations of study	12
1.8 Outline of the Thesis	14

1.9 Operational Definition of Terms	14
Endnotes	16
Chapter Two: Literature Review	
2.1 Conceptual Review	17
2.1.1 Online Banking	17
2.1.2 Types of Online Banking	21
2.1.3 Types of Network Intrusion	25
2.1.4 Internet Fraud	29
2.1.5 Intrusion Detection Systems	32
2.1.5.1 Network-Based Intrusion Detection System	33
2.1.5.2 Host-Based Intrusion Detection System	33
2.1.6 Intrusion Detection Systems Techniques	34
2.1.7 Machine Learning	35
2.1.8 Types of Machine Learning	38
2.1.9 Ensemble Learning	45
2.1.10 Simple Ensemble Techniques	48
2.1.11 Fuzzy Logic	50
2.1.12 Components of Fuzzy Logic	52
2.1.13 Applications of Fuzzy Logic	53
2.1.14 Fuzzification	54
2.1.15 Boosting	55
2.1.16 AdaBoost	57
2.1.17 LogitBoost	59
2.1.18 RealBoost	61
2.1.19 MultiBoost	63
2.2 Empirical Reviews	66
2.4 Summary of gaps in Literature	75
Endnotes	77
Chapter Three: Methodology	
3.1 Research Approach	82
3.1 Fuzzification of data for Intrusion Detection Model Performance Evaluation	83

3.1.1 Fuzzy Logic	83
3.1.2 KDDCup 99 Dataset	83
3.2 Performance Evaluation of Homogenous Boosting Machine Learning Algorithm	89
3.3 Comparative Analysis of Homogeneous Boosting Ensemble Algorithm Performance	91
Endnote	92
Chapter Four: Results and Discussion of Findings	
4.1 Data Fuzzification for Instrument Detection Model Performance Evaluation	93
4.1.1 Classification of training data	93
4.1.2 Strategy for development of fuzzy rules	94
4.2.1 LogiBoost Algorithm Performance	96
4.2.2 RealBoost Algorithm Performance	97
4.2.3 AdaBoost Algorithm Performance	99
4.3 Comparative Analysis of Homogeneous Boosting Ensemble Algorithm Performance	100
4.3.1 Evaluation based on Accuracy	101
4.3.2 Evaluation based on Sensitivity	102
4.3.3 Evaluation based on Specificity	104
4.3.3 Evaluation based on Precision	105
4.3.4 Evaluation based on Kappa Statistics	107
4.3.5 Evaluation based on AUROC	108
4.3.6 Homogenous Algorithm Performance Evaluation Summary in Cross Validation and Hold-Out Methods	110
4.2.2.2 Algorithm Performance Evaluation Summary in Cross Validation Method	110
4.2.2.3 Summary of Algorithm Performance Evaluation in Hold-Out Method	111
4.5 Discussion of findings	113
Endnotes	119
Chapter Five: Summary, Recommendations and Conclusion	
5.1 Summary of Findings	121
5.2 Recommendations	122
5.3 Conclusion	123
Bibliography	127
Appendix A: Classification Using WEKA	138
Appendix B: Some of the results from the classification	144
Bio-Data	149
The University Compliance Certification	153

List of Tables

2.1 Max voting	
2.2 Averaging	
2.3 Weighted Average	
3.1 Various types of attacks described in four major categories	38
3.2 A complete list of features given in KDD cup datatest	38
4.1 Confusion matrix for LogiBoostusing cross validation method	48
4.2 Confusion matrix for LogiBoost using hold-out method	49
4.3 Confusion matrix for RealBoost using cross validation method	50
4.4 Confusion Matrix for RealBoost using hold-out method	50
4.5 Confusion matrix for AdaBoostusing cross validation method	51
4.6 Confusion matrix for AdaBoosting hold-out method.	51
4.7 Evaluation based on Accuracy	52
4.8 Evaluation based on Sensitivity	54
4.9 Evaluation based on Specificity	55
4.10 Evaluation based on Precision	56
4.11 Evaluation based on Kappa Statistics	57
4.11 Evaluation based on AUROC	59
4.12 Result summary of cross validation method for Homogenous Algorithms	60
4.13 Result summary of holdout method for Homogenous Algorithms	61
4.14 Evaluation Results of Intrusion detection System	63
Endnotes	66

List of Figures

2.1 Intrusion Detection System	35
2.2 Types of Machine Learning	45
2.2 A diagram depicting Fuzzy Logic Temperature	55
3.1 Methodology Process Flow (Researcher's Model,2023)	82
3.2 Fuzzy-Rule Based Approach (Researcher's Model,2020)	83
4.13 Evaluation based on Accuracy (Source: Researcher's Model, 2023)	102
4.13: Evaluation based on Sensitivity (Source: Researcher's Model, 2023)	103
4.13: Evaluation based on Specificity (Source: Researcher's Model, 2023)	105
4.13: Evaluation based on Precision (Source: Researcher's Model, 2023)	106
4.13: Evaluation based on Kappa Statistics (Source: Researcher's Model, 2023)	108
4.14: Evaluation based on AUROC curve (Source: Researcher's Model, 2023)	109
